

Industrial Museums Scotland

Working together for a sustainable future
for Scotland's industrial past

Life before IMS

- Association of Independent Industrial Museums and Heritage Sites in Scotland.
- An informal, un-constituted grouping of industrial museums established in the early 1980's.
- Led by Jim Arnold of New Lanark.
- Guided and inspired by John Hume.

Early AIMHSS meetings...

- Were held in sheds on building sites.....
- but only on grey, rainy days.
- Considered the latest threat to existence.....
- or the latest madcap proposal.
- Offered mutual encouragement and support.
- Local initiatives in absence of national action
- Hunter-gatherers of the museum world
- Or beyond the pale?

AIMHSS members

- New Lanark
- Scottish Maritime Museum
- Scottish Mining Museum(s)
- Bo'ness Heritage and SRPS
- Wanlockhead
- Dalmellington

and later....

- Summerlee (Heritage Trust)
- Dundee Heritage
- Almond Valley
- Scottish Fisheries Museum

AIIMHSS action

- “100 sites” booklet
- Joint promotion
- Exchanging knowledge
- Provide a voice
- Lobby for recognition
- Lobby for funding
- Lobby for survival

Plans and pleas

- Miles Report (1986) recognised importance, and suggested structure for the sector.
- 1989 - Community Programme ends.
- Pattison (1999), warned of failure of museums.
- 2001 - Survival funding to SMM, SMM & SFM
- 2009 - Emergency funding to Mining Museum

Museums Think Tank

Museums Think Tank

- “how to achieve a sustainable future for industrial museums has proved to be the most difficult area for the Think Tank to agree on. There is agreement, however, that our industrial heritage is important and that maintaining the status quo is not an option.”

Museums Think Tank

- Recommends that government explicitly agrees direct funding to SMM, SMM & SFM.
- Recommends that government supports the establishment of a federation of industrial museums whose members are encouraged to work together to achieve optimum efficiencies.

Industrial Museums Scotland

- Memorandum of Understanding (2011)
- Bringing together accredited *independent* museums with Recognised industrial collections, in order to promote sustainability.
- Led by 3 museums receiving government funding; links to NMS, HS, and MGS

Our members

- National Mining Museum Scotland
- Scottish Fisheries Museum
- Scottish Maritime Museum
- Almond Valley
- Dundee Heritage
- Museum of Lead Mining
- SRPS
- The Museum of Scottish Lighthouses

Further members

- Aberdeen Maritime Museum
- Summerlee Museum of Scottish Industrial Life

IMS achievements so far....

- Joint reporting by lead members.
- Volunteer coordinator intern, funded through MGS, shared by lead members.
- Collections management software and equipment, funded by government.
- IMS Coordinator – part-time post, funded through Recognition fund.

IMS: Where we are now

- Collections and sites representing many of Scotland's traditional industries (but with big gaps).
- Collections and organisations that are based at original locations and rooted in communities.
- Limited coordination between member museums (so far), with the rest of the museum community, the world of archives or with other heritage agencies.
- Great variations in objectives, governance, sources of income, and the scale of challenge facing our museums.
- Recognition that admission charges alone will never be sufficient to sustain an industrial

IMS: diversity and similarity

INDUSTRIAL MUSEUMS SCOTLAND

Governance and Sources of Revenue Income within the IMS Membership.

"Earned income" describes significant sums budgeted every year to fund core services – not project funding.

	Contract income						Earned income										
							(1)	(2)	(3)	(4)	(5)	(6)	(7)				
	Recognised industrial collection	Independent museum	Local authority museum	Local authority operated	Contract with Local Authority	Contract with Government	Contract with industry	Admission income	Other visitor income	Income from museum property	Income from other property	Other commercial income	Income from social enterprise	Revenue from fund-raising	Volunteer managed	Volunteers deliver core services	Volunteers assist
Aberdeen MM																	
Almond Valley																	
Dundee Heritage																	
Lead Mining																	
NMMS																	
SFM																	
SMM																	
SRPS																	
Lighthouses																	
Summerlee																	

(1) Income from museum visitors. eg. catering, gift shop.

(2) Income from other users of museum facilities, e.g functions, private hires etc.

(3) Income from other property, eg warehousing, industrial premises, etc.

(4) Any other commercial income, eg. licensing, supply of services, etc.

(5) Income from associated not-for-profit activities, eg. children's farm, railtours, etc.

(6) Unrestricted donations from supporters, friends and from fundraising

(7) The museum would be unable to deliver some core services without volunteers.

Diversity: good ?

- Museums draw income from a wide range of sources – not all drinking from the same trough.
- There's a wide range of expertise within the sector that might potentially be shared.
- Interaction of different business models breeds cross-fertilisation of ideas and innovation

Diversity : bad?

- Different business models have different development requirements.
-and means less common ground for collaboration and collective action.
- An imposed requirement to act collectively may be an additional burden.

IMS: What happens next?

- How do we work together to “achieve optimum efficiencies” or “promote sustainability”?
- Identify areas of common interest where collective action would be of mutual benefit.
- Perhaps closer coordination between the 3 funded members; some sharing of functions?
- Perhaps some voluntary alignment of policies and activities, inspired by a common vision.
- Rather than impose uniformity, each would contribute to the vision in ways best suited to its culture and circumstances.

In thirty years time..?

- Survival of structures and collections at their original sites?
- Survival of specialist expertise, skills and equipment
- Survival of specialist knowledge
- Survival of public interest in defunct industries and past ways of life.

In thirty years time..?

- A coordinated network of vigorous community based industrial museums operating as effective businesses.
- Constantly evolving and re-interpreting the past to serve the issues of the day.
- Centres of industry-specific knowledge; a focus for research and learning; a shop-window for other heritage partners.
- Encouraging practical participation by new generations.

What we need

- Recognition, and business development support appropriate to a museum's needs.
- A level playing field with national museums and other nationally funded organisations
- Convergence of heritage interests; setting aside of professional boundaries.
- A shared, overarching vision for industrial heritage in Scotland.

the optional gorilla slide.

A black and white photograph of a steam locomotive traveling along a railway track that curves into the distance. The locomotive is emitting a large plume of white steam. The landscape is flat and rural, with a fence line in the foreground and a small, rounded hill in the background under a cloudy sky. The word "Goodbye" is written in white serif font in the lower right corner.

Goodbye
